Lining a tunnel and learning as you go	7:12	Sonning railway cutting—Crossing the cutting with segments at	2:20	Calderwood, R. W.: Explosive testing of fibre-reinforced concrete	1:26
Lloyd's aim for quality at Chatham	4:16	Sound mirrors—Kent's strange concrete ears	12:16	Chung, H. W.: An appraisal of the ultrasonic pulse technique for detecting voids in concrete	11:25
Loans—Shear strength of concrete joints under dynamic	3:27	Spitalgate Primary School	6:18	Shear strength of concrete joints under dynamic loads	3:27
Loanhead's most conspicuous object	1:22	Steel reinforcement and prestressing tendons—an appraisal	4:28	Clarke, A. J.: Block paving—research and development	7:24
Low-cement concrete mix—Durability of	7:19	Storage building—The "shoe" that sits by the M6	12:12	Clarke, Les: The new Bridge code	3:20
M6—The "shoe" that sits by	12:12	Strength (shear) of concrete joints under dynamic loads	3:27	Coles, J. A.: Colour and pigments	3:16
M180—Advanced technology	10:16	Stresses—Distribution of due to continuous corbels in cylindrical shells	9:30	Doidge, Pauline: Training scheme with a difference	6:29
Malvern's Sports Centre—An architect's adventure story	4:26	Striking design for concrete housing	1:29	The great UK canoe race	8:24
Metal soldiers—Design, testing and performance of	2:25	Testing (explosive) of fibre reinforced concrete	1:26	Keith McCarter—Environmental artist	11:32
Multi-storey car park, Design of	6:22	Threaded reinforcement joints	3:32	Dowrick, D. J.: Prestressed vs reinforced concrete flat slabs	9:16
HM Naval base—Devenport—Precast walling for	1:12	Training	1:12	Evans, W.: An appraisal of steel reinforced and prestressing tendons	4:28
The new bridge code	3:20	Training school with a difference	6:29	Goodwin, Michael: Malvern sport's centre—an architect's story	4:20
North Africa—Industrialized housing in	1:16	Treatment of joints in precast cladding	12:21	Hammersely, G. P.: Practical concrete petrography	8:27
Not with a bang but a drip, drip, drip	6:8	Trent Bridge	10:16	Hill, A. W.: FIP—past, future and present	5:56
Offshore concrete—An innovation	7:35	Trough floors	11:29	Hughes, B. P.: Assessing the strength of composite beam and hollow block construction with non-structural screeds	3:24
Parashell dome—Malvern Sport's Centre	4:20	Tunnels—concrete	12:18	Hunt, Harry: Concrete and a french connection	6:34
Plastic inserts—Decorative slabs with	8:26	Tunnels—Lining and learning as you go	7:12	McGregor, T.: Industrialised housing in North Africa	1:16
PCI at St Louis	2:28	Twickenham RFC—Repairs to a stand	10:27	Marsh, Paul: Not with a bang, but a drip, drip, drip	6:8
Petrography—Practical concrete	8:27	Ultrasonic pulse technique for detecting voids in concrete—An appraisal	11:24	Meikle, T. A. V.: Treatment of joints in precast cladding	12:21
Pipe—how to bake a concrete, Practical concrete petrography	9:38	USA—Concrete's role in prestige buildings in	11:21	Mills, A. C.: The great UK canoe race	6:38
Precast cladding—Treatment of joints in	8:27	US ramping programme	8:31	Narasimhan, N.: Prestressed vs reinforced concrete flat slabs	9:16
Precast concrete walling for a naval base	8:12	Voids—An appraisal of the ultrasonic pulse technique for the detecting of in concrete	11:25	Nesbit, J. K.: Assessing the strength of composite beam and hollow block construction with non-structural screeds	3:24
Prestressed concrete: a second bridge for Runnymede	11:15	Wadham College	6:14	Neville, Adam: Is research relevant to design	7:22
Prestressed concrete: Weatherwise at Byker	11:12	Waffle Floors	12:25	Osgood, Steve: Precast concrete walling for a naval base	8:12
Prestressed vs reinforced concrete flat slabs	9:16	Water retaining structures	10:13	Pinfold, G. M.: Distribution of stresses due to continuous corbels in cylindrical shells	9:30
Prestressing tendons & steel reinforcement—an appraisal	4:28	Waverly Castle Hotel	7:16	Power, T. O.: Practical concrete petrography	8:27
Ramps—US ramping programme	8:31	Weatherwise at Byker	11:12	Pratt, L. G. A.: Water retaining structures	10:12
Reconstruction of Oxfordshire weir	3:19	Why an exposed aggregate precast concrete	9:20	Robins, P. J.: Explosive testing of fibre-reinforced concrete	1:26
Reinforced I/w concrete—Lloyd's aim for quality at Chatham	4:16	Workability of flowing concrete	10:28	Royce, Norman: The expert witness and others	8:21
Reinforced concrete storage building—The "shoe" that sits by the M6	12:12	World of concrete, Phoenix	4:30	Sampson, D. S. M.: Remodelling a 110-year old concrete hotel	7:16
Reinforced vs prestressed concrete flat slabs	9:16	World of Concrete Exposition, Atlanta	12:38	Smyth, Bill: Weatherwise at Byker	11:12
Reinforced concrete—Weatherwise at Byker	11:12			Stanley, Chris: Greece—old and new	2:14
Reinforcement joints—Threaded	3:32			Stemp, Alan: The "shoe" that sits by the M6	12:12
Remodelling a 110-year-old concrete hotel	7:16			Walford, Leslie: Facing up to new demands	9:23
Repairs to a stand at Twickenham	10:27			Wilkinson, J. M.: Design of multi-storey car parks	6:22
Replacing a stonework cornice	1:25			Wood, Humphrey: Weatherwise at Byker	11:12
Is research relevant to design	7:22			Wright, M. S.: Threaded reinforcement joints	3:32
River Exe Viaduct	6:16			Zawatzky, Estelle: How to bake a concrete pipe	9:35
Road construction, concrete	11:18				
Royal Portbury Dock, Bristol	6:20				
Runnymede, A second bridge for	11:15				
Screeds (non-structural)—Assessing the strength of composite beam and hollow block construction with	3:24				
Sculpture—Kieth McCarter—Environmental artist	11:32				
A second bridge for Runnymede	11:15				
Segmental units—Weatherwise at Byker	11:12				
Semi-industrialized system for developing countries	9:42				
Shear strength of concrete joints under dynamic loads	9:27				
Shepherd's House railway bridge	2:20				
The "shoe" that sits by the M6	12:12				
Silver Street, Edmonton,—Apartment form technique in concrete	9:32				
The Snow Award for Innovation	6:20
